

Sprint 2 Retrospective Document

Group 6

Group members: Aaron Linnell, Brian Belt, Nhien Nguyen, Mohammed Alwahaibi

Completed during Sprint 2:

Web frontend moved to MVC project.

Airport, Aircraft, and FlightPlan class implementations, and respective unit testing.

Test data generator classes for aforementioned types.

Database access class for web frontend project.

Issues to address during continued development:

Highest Priority: Merge branches into single development branch, remove repeated files copied from main project in web frontend project. Combine projects under one solution.

Finalize database schema and finish integration with web frontend.

Finish integration demo (List flights in database on a webpage).
